E-Faktura Integration For Bulgaria

for Microsoft Dynamics 365 Business Central

intelligent systems

Overview

E-faktura Integration is an extension to Microsoft Dynamics 365 Business Central. It extracts predefined fields from sales and service documents and generates XML files that meet E-faktura's technical requirements.

E-faktura by BORICA

How does the process work?

The solution enables the export of sales and service documents generated in Microsoft Dynamics 365 Business Central ERP system into E-faktura ready XML files. The export is based on predefined templates for each type of document. The application's templates setup process is easy, flexible and intuitive. The XML files are saved in a preferred location and afterwards uploaded to the E-faktura platform.

Features

- Generates XML files compatible with BORICA's e-invoicing platform E-faktura
- Allows defining and setup of an unlimited amount of document type templates
- Single-click export of one or bulk sales documents

E-faktura

E-faktura is the biggest platform for electronic invoicing in Bulgaria, developed by BORICA. With E-faktura businesses operating in Bulgaria can exchange electronically sales documents in XML-structured format.

Benefits

Supported document types

Sales invoice . Sales debit memo (debit note) . Sales credit memo (credit note)
Service invoice . Service debit memo (debit note) . Service credit memo (credit note)

E-faktura Integration App is designed to facilitate the work of the accounting departments that uses the E-faktura platform for electronic invoices exchange. It automates the processes and eliminates the daily repetitive tasks by providing bulk documents exports to XML files.

E-faktura Integration

Benefits

- Saves time by reducing the repetitive actions when exporting a large number of invoices
